

CYLINDER BUNDLE

ACCESSORIES

Filling Connectors

PDF FILE

Description

- Allows the operator to check the pressure of a cylinder or a bundle in full security.
- Agreed for the adiabatic compressions in oxygen by CTE.
- Frame Purging System allows to purge HP gas cylinders frames in fully safe conditions.
- Cylinder pressure check
- Bundle pressure check
- Bundle purging

Working Conditions

- Industrial gases: O₂, H₂; rare gases, inert gases and gas mixes, other fluid on request.
- Medical gases: O₂, N₂O, air and mixes...
- Service pressure range: from vacuum to 420 bar.
- Working temperature range: -40°C/+80°C.

Technical Data

- Brass construction.
- O-ring following customer request.

Connections

- Any connectors following customer request and valve cylinder.
- Valve cylinder with residual pressure.
- Pressure Gauge DN100 class 1.
