QUICK CONNECT

Filling Connectors

[PDF FILE](#)

Description

Always inovating : MRTech presents its Quick Connect new range of filling connectors : Based on a MRTech patented design, the quick connect filling connector saves operation time, benefits to the operator, and increases operations safety.

Connection is Quick, Easy and Safe

- Pull back the connector jacket.
- Place the connector onto the cylinder valve.
- Push the jacket and the connector raws tighten the cylinder valve.
- Actuate pin to bump RPV (manually or pneumatic remote action).
- Start filling operations.
- Operator Safety : the patented design of MRTech Quick Connector prevents from connector ejection as soon as pressure rises.

Several Configurations Available

- C type, F type, DIN 477 on request.
- Multi valve option (adjustable pin length).
- Manual or pneumatic remote actuator for pin course to bump RPV.
